

# Recycling Businesses Across Delta State: A Geo-Mapped Overview

materials   general   hazardous   metal   plastic   textile

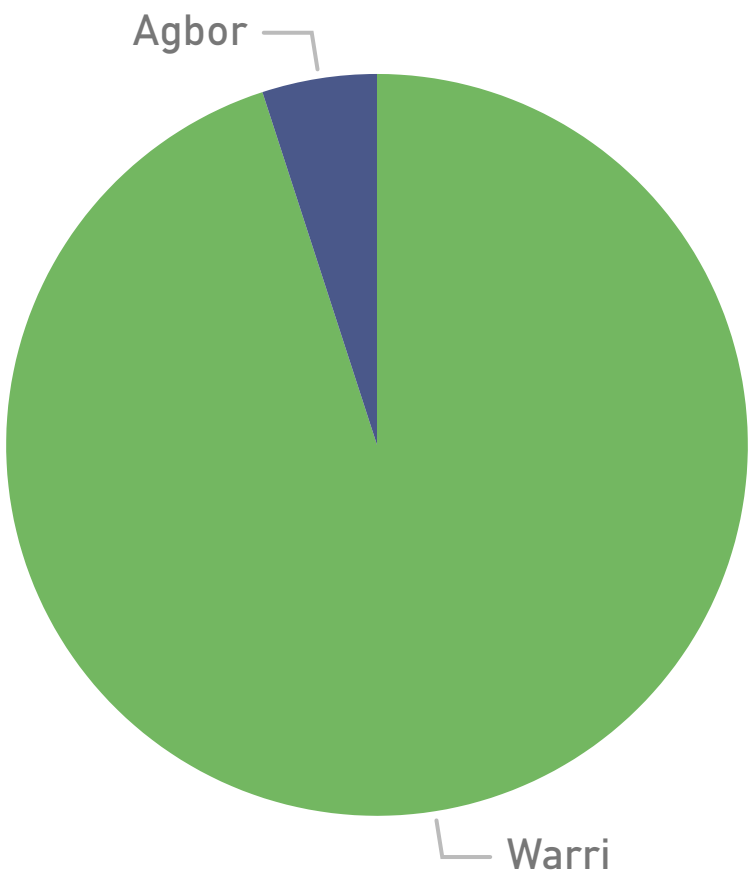

Recycled Materials Count.

materials   plastic   metal   textile   hazardous   general

Distribution of Recyclers in Delta State Major Cities.

*The visualization highlights that recycling businesses in Delta State are concentrated in Warri (95%), with limited presence in Agbor (5%), and primarily focus on recycling plastic and metal, leaving textiles, hazardous waste, and general waste underserved. To address these gaps, expanding recycling facilities to underserved areas like Asaba, diversifying recycling efforts to include neglected materials, and fostering strategic partnerships with governments, NGOs, and private entities are essential. Additionally, setting up waste collection hubs in rural areas and conducting community engagement programs can enhance recycling accessibility, public awareness, and sustainable waste management across the state.*
